Distribution of Dual Action Tilt & Turn windows and doors

Tilt & Turn Vinyl Windows

- Easily switch from closed to fully open position with just a single hand
- Select from multiple levels of ventilation
- Great overall performance and cost efficiency
- High security because of 8-10 point locking mechanisms
- Easy maintenance and many color options
- Flexibility of window designs

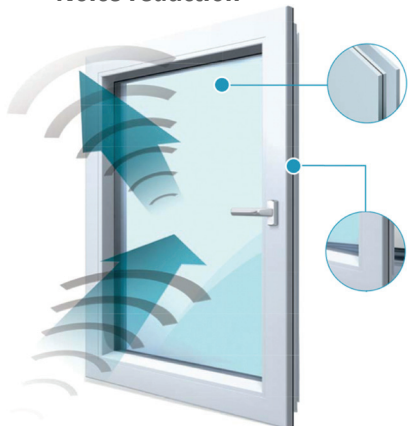

Turn the handle 180° for tilt action.

Turn the handle 90° to open the window.

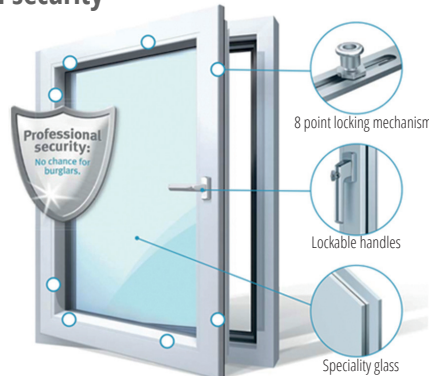

Noise reduction

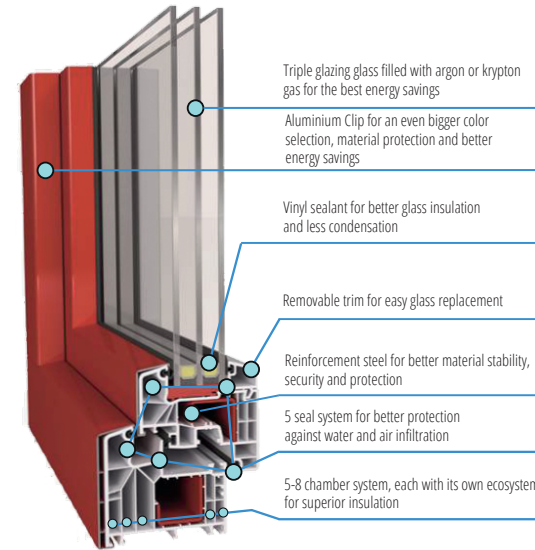

Windows with active insulating glazing help to save resources. Beside their considerably enhanced solar and heat insulation and their optimal transparency to light, these windows provide excellent sound insulation and can reduce noise levels by up to 45 dB.

The main job of the frame is to safeguard the mechanical stability needed for the active sound insulating glazing and to maintain the pressure on the gasket.

High security

Our products top features

Easy Maintenance

Mild detergents and water are completely adequate for cleaning the frames and sashes of our profiles, even after years of use, eliminating the need for expensive and time-consuming coats of paint.

High Security

Our steel reinforced frame and multiple locking point system provides a security level unmatched by any standard available product.

Product for Lifetime

Changes in weather and regular air pollution can have an adverse effect on a window components and function. Our vinyl windows are designed for maximum durability and longevity.

Custom Solution

Whether a standard opening or complex configuration our products will meet your needs with no additional customization costs.

Noise Reduction

Multiple point locking mechanism combined with several seals, gaskets and active sound insulating glazing provides for superior sound reduction.
